FACTORY RADIOS, NAVIGATION, IPODS & INTEGRATION

FACTORY RADIOS:

Some factory systems disable important features when installing aftermarket systems or will only allow factory systems to be installed if upgrading to navigation. We can do factory decks when necessary and we can also do FACTORY NAVIGATION even when your own techs say it can't be done.

EXAMPLES:

Lincoln Navigator Navigation

Ford F150 Navigation

GM PU/SUV Navigation

Ford Six-Disc CD Changer

IPOD/AUX ADAPTORS:

Almost ALL factory radios and navigation systems are now capable of controlling iPods and aftermarket AUX adaptors. Call us for applications and include what your customers will certainly add in the aftermarket if you don't sell it to them!

2007-08 GM FACTORY NAVIGATION VEHICLE IN MOTION MODULE

- **One Year Warranty**

BLUETOOTH HANDS-FREE KITS & ADAPTORS

Laws governing text messaging and cell phone use while driving are now on the books in Washington. We can help you use the new laws to your advantage by adding Hands-Free Cell Phone kits to your customer's vehicles, adding hundreds, if not thousands of dollars each month to your accessory sales!
Not only are all you ***NEW*** car sales eligible for Bluetooth Kits, but all ***USED*** cars and ***PARTS & SERVICE*** customers should be offered the installation of car kits. Consider making it a ***PRELOAD*** on all commercial vehicles in your inventory, as most commercial trucks have multiple drivers, and all of our kits will accept multiple phones. In other words every vehicle that rolls onto or off of your lot can have Bluetooth installed! This can be a huge source of additional income while doing a genuine service for all of your customers—helping them avoid a $101 ticket for driving while talking on their cell phone!

SIRIUS Traffic XM NAVTRAFFIC

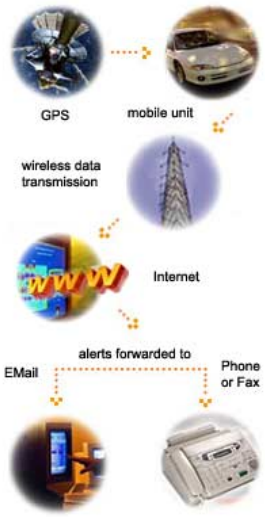
ECLIPSE SIRIUS TRAFFIC PIONEER GEX-P10XMT

Sirius Traffic & XM NavTraffic™* powered by NAVTEQ Traffic allows Eclipse and Pioneer Navigation Systems to serve as a powerful tool that helps the driver understand traffic conditions and routes the driver to their destination avoiding traffic congestion. The traffic information is provided through a satellite broadcast with data which is aggregated from multiple sources — including leading commercial traffic data providers, government departments of transportation, police and emergency services, road sensors, cameras and airborne reports.

GPS TRACKING/SECURITY

STEALTH TRACKING

Stealth Tracking is the most innovative provider of location information services to customers for metropolitan and rural areas nationwide. Stealth Tracking has invested substantial resources into research and development to ensure system reliability and quality.
Stealth Tracking has set the standard for internet-based wireless asset tracking, and today holds a premier market positions as one of the most innovative and low-cost providers of vehicle location service. Stealth Tracking provides its many customers throughout North America with a reliable, low-cost accurate vehicle location and recovery service for commercial fleets and consumer auto owners.



Stealth Tracking advantages are:

- **Protecting people, vehicles, and assets**
- **Saving money and time**
- **Improving customer service and satisfaction**
- **Monitoring fleet locations**
- **Minimal power consumption**
- **Affordable and technically advanced**

ST3200 Unit service features:

Vehicle Location Request - Receive current location, speed and heading.
Vehicle Location History Request - Access historical location and event history.
Door Unlock - Electronic device can be installed in the vehicle to unlock door(s), turn on lights, sound the horn or control any electrical device on board the vehicle.
Starter Interrupt - Electronic device can be installed in the vehicle to disable the starter.
Geographic Boundary - An electronic barrier / fence will cause an alarm message to be sent when an entrance or departure is made from a fixed geographic area.
Power management - Controls the use and distribution of the vehicle's power source and the Power Management for overall reduction in the average power consumption of the unit. It won't drain the vehicles' battery and will alert the user if the vehicle battery is low.

Locating and tracking are done on a secure website at the customer's discretion. Up to 3 month's history is available at any time. User interface (pictured below) is standard Google Maps screen with Map view, Satellite view or Hybrid views available. Features that can be overlaid on map:

- Speed Warning
- Geofence Violations
- Security Violations
- Power Interruptions/Dead battery
- Vehicle Locates

Coverage extends to all 50 states, Canada and Mexico and up $3000 insurance is available if vehicle is stolen and not recovered within 30 days. Theft Recovery Hotline is staffed 24/7/365 to help police recover stolen vehicles.

There are no signup, registration or monthly fees - only annual fees, and even then, only after the first year! New technology allows huge increases in usage with very competitive packages available. The system ships with 5000 uses for the first year and customer can continue with 5000 uses indefintely for only $79.95 per year!

Call us for details and a demo of this amazing technology!

ABOUT ADVANCED DIGITAL CONCEPTS

The last 32 years have seen dramatic changes in mobile electronics, and we've seen and done it all, giving us invaluable experience in getting the job done right, the first time! We guarantee you and your customer's satisfaction with our work and look forward to developing a long-term relationship built on performance and trust. ADC is nationally recognized as a leader in the expediter business, as evidenced by our coverage in the August, 2005 issue of Mobile Electronics magazine:
